

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

Experiment-2.2

StudentName: Aman Kumar

UID: 21BCS5328

Branch: B.E.-CSE

Section/Group: NTPP_CC_602-A

Semester: 6th

Date of Performance: 26/02/2024

SubjectName: Cloud Computing and Distributed Systems

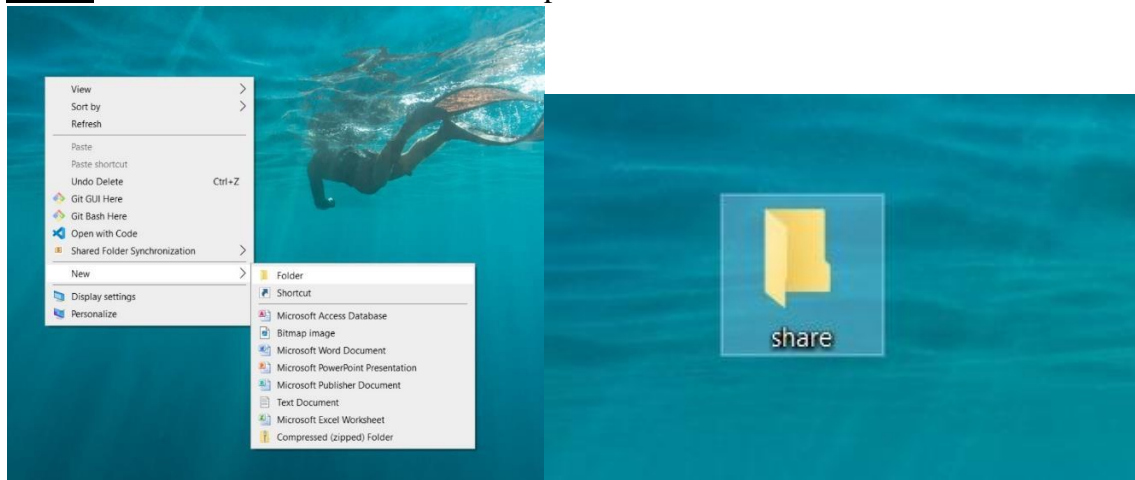

SubjectCode: 21CSH-378

Aim: To find a procedure to transfer the files from one virtual machine to another virtual machine.

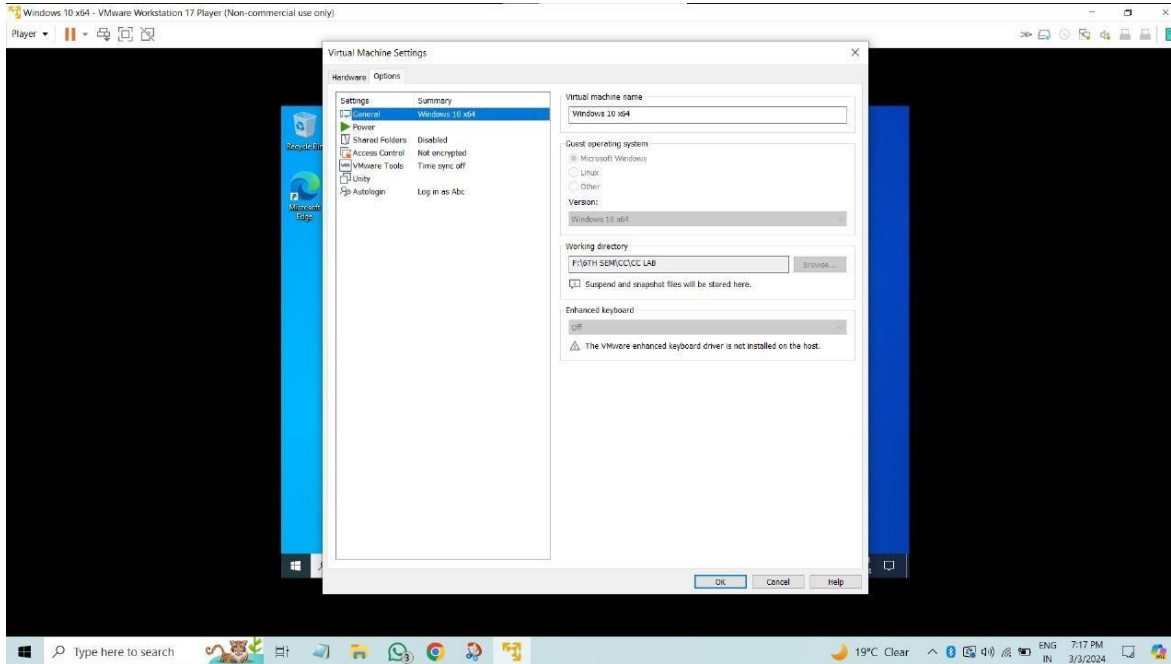

Objective: The objective is to find a procedure to transfer the files from one virtual machine to another virtual machine.

Script and Output:

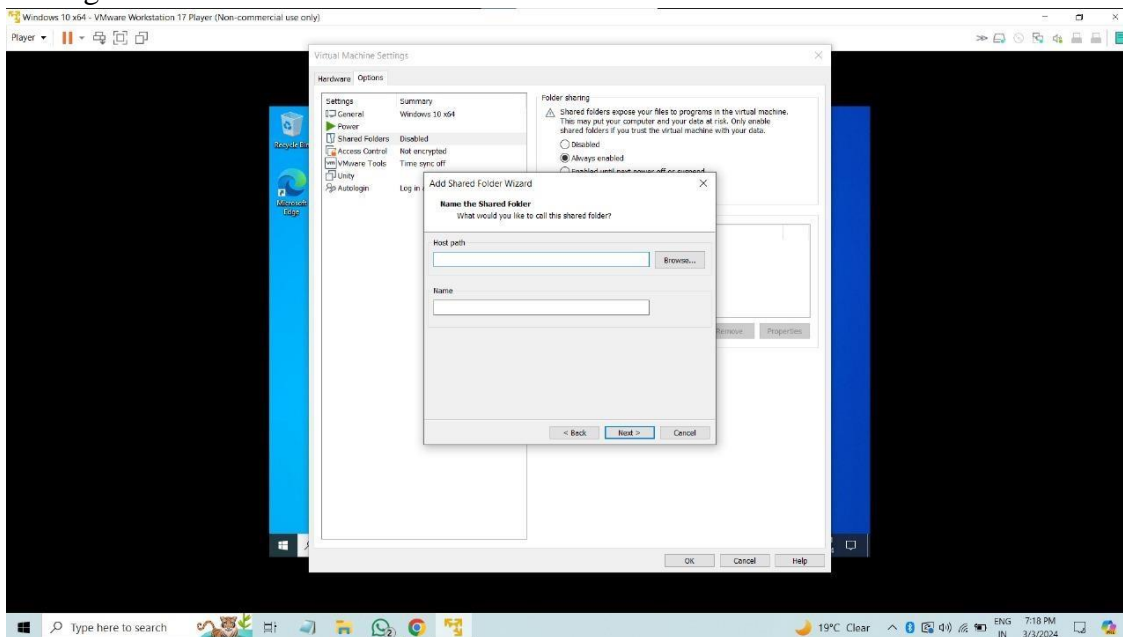

Step 1: Create a folder named share on the desktop on the machine

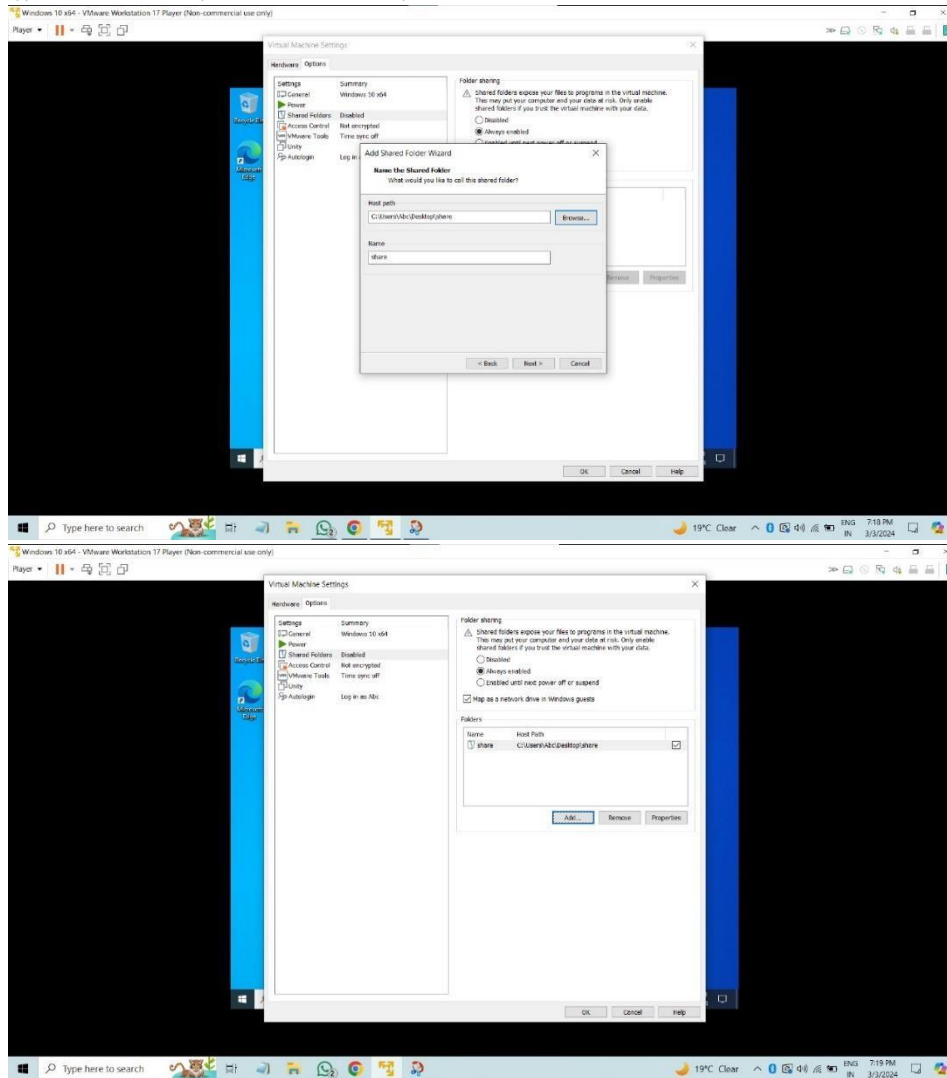

Step 2: Start the virtual machine.

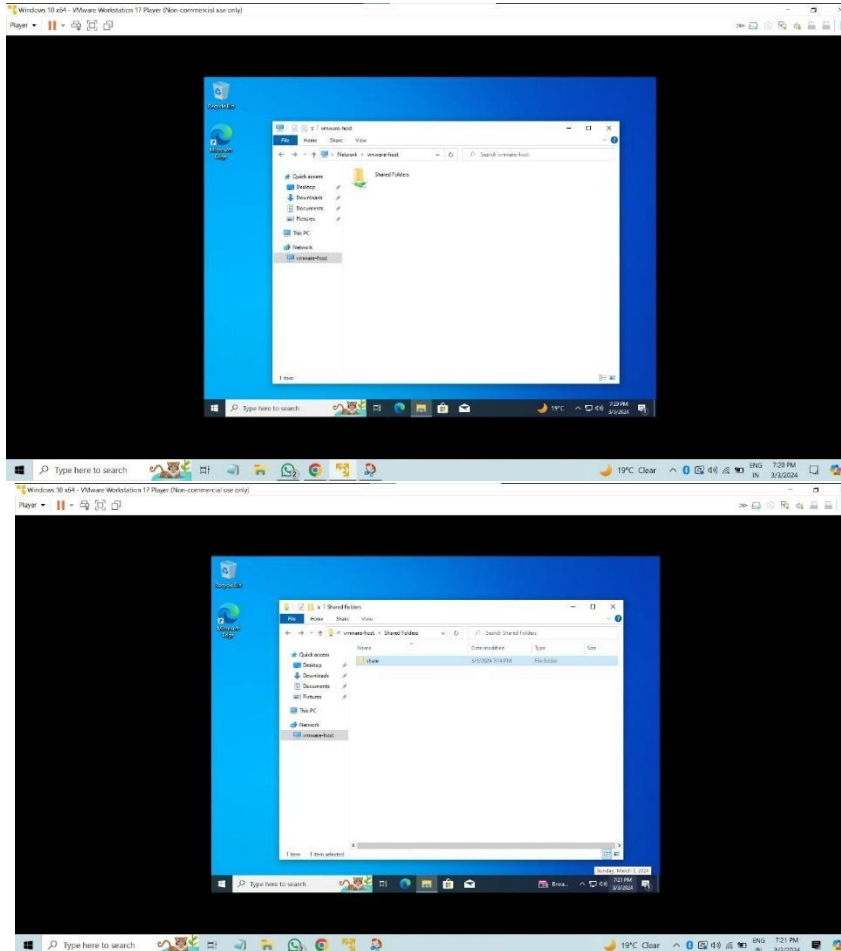

Step 3: Once the virtual machine is running, go to VMWARE setting and in options turn on enable for file sharing.

Step4: Look for the shared folder under Network Locations or Shared Folders. It might be named something like `\\vmware-host\Shared Folders\<folder name>`.

Step5: Access the shared folder and verify that you can see the files from the Windows desktop machine.

Learning Outcomes:

- Understanding of Cloud Computing Concepts
- Critical Thinking and Problem-Solving
- Data Analysis and Visualization
- Decision-Making in Cloud Infrastructure Management
